

Once-off Workshops

Teachers

Leaders

Students

Parents

Schools requiring once-off sessions will benefit from our extensive workshop options, which are available in-person and online.

Workshop Options

Teacher Workshops

Our sessions are highly interactive, with activities, discussions, and practical ideas. All workshops are available either as Face-to-Face sessions, or online via Zoom webinar.

Face to Face

A Keller staff member will present a dynamic workshop at your school, to enhance your selected topic.

Pricing below excludes applicable travel costs -

90 minute Workshop: R 11 000

3 hour Workshop: R 13 000

6 hour Workshop on request (2 x 3hrs over 2 days)

Webinar

Any of the presentations below can be adapted to a 75 minute Zoom Webinar.

1 - 495 logins: R 9 000 per webinar.

This includes Event Logistics Management:

- Invitation/Flyer, Registration link and login information for staff members (or single login if staff are all together in a hall).
- An interactive Whatsapp or Chat group (for comments, questions, and sharing slides).
- Post Event Pack with a recording, summary information and feedback
- Polls, Chat & Questions throughout the event.

Topics Available

Zip the Crocodile - 90 min | 3 Hour

Based on Gavin's popular book, Zip the Crocodile, delegates are taught about the complexity of the brain in a teacher-friendly manner that can be applied in every aspect of their professional careers.

The presentation style models how the brain learns. In this session you will learn:

1. The Three Levels of the Triune Brain.
2. The way the brain processes sensory input.
3. The fact that the brain is designed to keep humans alive.
4. How educators need to bypass the safety zone by making sure that every student feels safe and worthy.
5. The importance of accessing the executive functions in the pre-frontal cortex.

Artificial Intelligence - A New Era in Learning and Innovation

Embrace the power of AI in education. Many schools are feeling overwhelmed by the rapid rise of AI, and what it will mean to the Teaching Profession. This Workshop is designed to provide clarity and narrow your focus so you can navigate the AI landscape. You'll be taken on a journey to unlock new possibilities in the classroom with cutting edge AI tools that will maintain your relevance in an ever changing world. Together, let's demystify AI, explore practical strategies, and ignite your creativity as we revolutionize the way we teach and learn.

Mind Right, Body Right - 90 min

The Brain and the Body operate as one system. The profession of teaching is in trauma, and teacher well-being is not an option, it is an imperative. In this session we provide insight into the importance of wellbeing, with great improvement tips and advice from a team who has been in their shoes.

Trauma Informed Schools - 90 min | 3 Hour

Discover how epigenetics revamp our understanding of human development. Teachers must understand that Stress is a dangerous marker. It's time to take an honest look at ourselves and answer the questions:

- Do we use stress as a motivator of students?
- Do we use stress to manage student behaviour?
- Do we use stress to ensure our school achieves the necessary academic accolades?

It's time to understand the impact of trauma and our role in dramatically reducing anxiety to provide true healing for our students.

Kids Who Challenge Us - 90 min | 3 Hour

How do teachers engineer better learning engagement and reduce oppositional reactions? All behaviour is communication. The secret message in this presentation is to equip teachers to always learn to step back and try to decipher what the student is trying to communicate. This requires education to think outside of the "behaviour box". Learn where behaviour dwells in the human brain and how all human behaviours are motivated by four key functions.

Teaching Struggling Brains - 90 min | 3 Hour

Improving Attention, Mental Health and Motivation in a digital age. Join this presentation to find out what influences our student's ability to learn. Are teachers struggling to adapt to a standardised world of education to the unique brains which they teach? Let's answer this together and find solutions.

The Power of Celebrating - 90 min | 3 Hour

Praise - Competition - Celebration - Recognition - Winner takes it all. This presentation is ideal for all teachers and school leaders. Society has stopped celebrating the process and opted for an assessment of the product to determine a response. In this presentation we will unpack: What the brain loves, what the brain needs to be successful, and how we can balance achievement recognition, with the power of celebrating (present participle showing continuous action). This continuous action in celebrating a child is essential to develop motivation and a commitment to improvement. Re-imagine the way you celebrate the children in your care.

Driven - Motivation & Accountability - 90 min | 3 Hour

In this presentation, learn to make use of brain-plasticity in our classrooms to develop self-driven motivation and personal accomplishment. Often broken (traumatised) children are perceived by educators as needing to be fixed. The brain is designed to self-heal. Environment determines the capacity for self-healing. School is the perfect environment where a charismatic teacher can embed positive emotions, engagement, relationship, meaning and accomplishment, and be part of the personal healing process.

Leadership Coaching

The Keller Leadership Series is designed to encourage and guide, and can be adapted to cater for school management teams, prefect groups, or SRC's.

75-minute Zoom call, which may include up to 10 Leadership team members:
R 9 000 per session

Contact us for Face-to-face options, and pricing for larger teams.

Topics Available

Conflict Management

Thomas Killman Conflict Management Tool.

Successfully operating as a team is essential in order to reach our goals. Teams are made up of different, unique beings. A knowledge of the team is crucial for high performing groups. This interactive presentation makes use of the Thomas Killman Conflict Management Tool. We then facilitate a group Conflict and Resolution Circle in order to identify the gold we bring and the shadows we carry. This is a positive experience for every team that has to work together.

Leading as a Team

In this session, we will cover the following:

1. What is Cohesion and how do we ignite the right drivers in our teams?
2. Purpose Driven Cohesion
3. Mindsets Matter in a Purpose Driven Collaborative Team
4. Sharpening the Arrow
5. Securing Accountability and Responsibility
6. Leading with Cohesion in mind

Vital Lessons in Leadership

A complex society requires sophisticated leadership. Learn about:

- The Four Pillars of Leadership
- The Framework of Leadership
- The Leadership Revolution
- The Power of the First Follower
- Leadership Styles

Care to Dare

Unleash the power of your leadership team

Principals and SMT's can neither Lead, Dare nor Unleash the power of their leadership team unless they are able to CARE for themselves FIRST. Learn about the brain science involved in leadership and how stress shuts down our ability to effectively lead teams.

Leadership - The Opposite of Controlling People

The 'Cloud 9' leadership qualities

Learn about the 'Cloud 9' leadership qualities in this fascinating session. 5% of Leadership is genetic, 95% is learned behaviours. All 9 of the skills shared in this presentation are learn-able. Let's dig in!

Leadership is Affirmation

In this practical session, leaders are taught about the power of Affirmation in Leadership. Learn to:

- Be approachable
- Acknowledge contributions and
- Create a positive environment.

Feedback - Recognition for Performance

In this presentation we will remind the leaders that the organising principle of the brain is to minimise danger and maximise reward. During this presentation we answer the questions:

- How do we take our colleagues on a positive brain experience while giving them feedback?
- How do we keep their brains in the reward phase without allowing them to drop into the danger mode and shut down, preventing them from processing the issues?

Parent Coaching

These entertaining and informative presentations provide parents with wonderful insight, gentle guidance, and practical ideas, as they navigate the challenges of parenthood. All workshops are available either as Face-to-Face sessions, or online via Zoom webinar.

Webinar

1 - 495 logins: R 9 000 per webinar

This includes Event Logistics Management:

- Invitation/Flyer, Registration link and login information for parents
- An interactive Chat group (for comments, questions, and sharing slides)

Face to Face

Pricing below excludes applicable travel costs -
75 Minute Workshop: R 11 000

Topics Available:

Rock Solid Foundation

The role of parents is to provide a rock solid foundation for their children. How to ensure you keep your children feeling safe, recognise their worth and help them become what they are destined to be.

Brilliant Kids

Is it IQ? Is it family socioeconomic background? Race? Gender? NO!
In a recent study 753 children who were in ECD in the 1990's were tracked for 20 years. What factors determined their brilliance? This presentation answers this question and shows the science behind what makes children confident, collaborative, and competent adults.

Raising Teens Raising Tweens

From Charming to Challenging - Strategies and Ideas to really enjoy this season of your children's lives. In this dynamic, flagship presentation, Keller Education will share the three big secrets of the tween/teenage brain. Meet the iGen, the first generation in human history to grow up with a smartphone in their pocket. The survey, using 11 million people, will make you rethink your role in raising your teen!

Devices & Development

In this webinar, which is a hot favourite in the 21st century, we unpack (and answer) the following questions:

- How much screen time is too much?
- How much is needed for effective development in this digital age?
- And how do we, as parents, find the balance?

Trauma Informed Schools

In this webinar based on cutting edge research, discover:

- How epigenetics revamp our understanding of human development.
- Learn how Stress is a dangerous marker.
- Answer the questions: Do we use stress as a motivator for our children? Do we use stress to manage discipline in the home? Do we use stress to ensure that our children don't add to our personal load?

It's time to understand the impact of trauma and our role as parents in dramatically reducing anxiety to provide true healing for our children.

Zip The Crocodile

Based on Gavin's popular book, Zip the Crocodile, delegates are taught about the complexity of the brain in a parent-friendly manner that will assist them to recognise how their brain is processing sensory data.

The presentation style models how the brain learns. In this session you will learn:

1. The Three Levels of the Triune Brain.
2. The way the brain processes sensory input.
3. The fact that the brain is designed to keep humans alive.
4. Behaviour is a language. Children would behave if they could.
5. How to teach your child to take control (ZIP) of their Survival & Emotional Brains.

Student Workshop

These informative and lively presentations will empower your students to better understand themselves, their behaviour and their peers. All workshops are available as Face-to-Face sessions.

Pricing below excludes applicable travel costs -

60min: R 11 000

3 Hour: R 13 000

Topics Available

Zip The Crocodile

Based on Gavin Keller's popular book, Zip the Crocodile, students are taught about the complexity of the brain in a student-friendly manner that will assist them to recognise how their brain is processing incoming sensory data.

The presentation style models how the brain learns. In this session your students will learn:

1. The Three Levels of the Brain, and the 'characters' which describe the functions.
2. The way the brain processes sensory input and how this makes us feel.
3. Behaviour is a language. Know me, connect with me.
4. How to control (ZIP) their Survival & Emotional Brains.

Controlling the Bully in Me

Bullying remains a persistent issue in the educational landscape, and the way schools address it can make a world of difference. At times, punitive measures may be employed, but a more thoughtful and holistic approach can yield more lasting results. In this presentation, a Keller teacher will focus on:

1. Understanding Cognitive Bias: Explore the impact of cognitive bias on behavior.
2. Roots of Bullying: Uncover the reasons behind putting others down.
3. Positive Skills for Success: Highlight the importance of sharing, collaboration, and helping others for overall success in school.

"Meet the Teen Brain"

Tweens and teens are probably the most misunderstood group. The effect of a massive surge of steroids to convert their growing childhood bodies into adults and the accompanied drop in neurotransmitters, render this cohort vulnerable and often broken. Although they may look like adults, they are not and neither do they want to be treated like an adult.

Devices & Development

Experience an eye-opening journey into the digital age with our captivating presentation. Discover why this generation's connection to smartphones is unlike any other!

- Unveil the secrets of screen time: How much is too much?
- Unlock the formula for effective development in the digital era.
- Decode the mystery: Why can't parents be 'cool' about phones?
- Learn the art of open, balanced discussions with your parents.

Let's Connect!

Our workshops are dynamic and adaptable, and we develop new content based on the latest research, all of the time.

So, connect with us, tell us your needs, and together let's **Re-imagine Schooling.**
